

Thirunavukarasu L

Tech Lead & Full Stack Developer

thirusherlock@gmail.com | +91 9360016589 | Chennai, India | Thiru's LinkedIn

PROFILE

Full Stack Developer and TypeScript Specialist with expertise in React, Node.js, Express, and MongoDB, delivering scalable, AI-augmented web solutions. Proficient in Data Structures & Algorithms, system design, and real-world application architecture with hands-on experience building performant, human-centered products.

WORK EXPERIENCE

Findroids Private Limited, Typescript Specialist

05/2025 – Present | Chennai, India

Technical Leadership & Architecture

- Architected and developed a comprehensive Proof-of-Concept (PoC) enterprise Excel Add-in used as a primary sales/pitching asset to secure Tier-1 banking clients; defined the technical scope, architectural boundaries, and mitigation strategies for platform limitations.
- Acted as a core Technical Mediator and onboarded as a contingency worker for JPMorgan Chase, bridging the gap between proprietary internal products and enterprise banking infrastructure.
- Spearheaded engineering culture by conducting Knowledge Transfers (KT) for junior developers, mentoring peers through complex Git workflows, and establishing TypeScript strict-mode compliance to enforce codebase reliability.

Core Engineering & Performance (Excel Add-in)

- Engineered mission-critical financial modules for an Excel Add-in servicing 40,000+ active users, including fxRate tracking, multi-tier payment creation, automated worksheet validation, drill-downs, and secure session management.
- Designed and deployed a high-fidelity mock server mimicking JPMorgan's production APIs, unblocking parallel development and enabling rigorous, isolated integration testing.
- Enforced robust architectural standards by leveraging Creational and Structural design patterns (Singleton, Factory) to build reusable, defensive, and highly maintainable components.
- Directed security and compliance efforts by managing vulnerability checks and code reviews across critical systems including payment status reporting, transaction data pipelines, and dashboard infrastructure.

AI & Internal Strategy

- Designed and implemented an AI Decision Agent using Jira API data, optimizing internal organizational workflows and streamlining strategic decision-making.

Dreams and Degrees EdTech Private Limited, Full Stack Developer

05/2024 – 02/2025 | Hyderabad, India

- Full-Stack Engineering:** Architected scalable core modules for collegememor.com, including data-driven college predictors, comparative analytics engines, and dynamic dashboards.
- Architecture Optimization:** Standardized TypeScript and Redux architectures across the React ecosystem, reducing engineering cycle times by 15% while eliminating critical bugs.
- Performance Engineering:** Restructured post-deployment CMS bottlenecks and applied advanced UI optimizations, yielding a 35% improvement in platform load speeds.
- Backend Systems:** Developed secure SQL relational database components and Spring Boot REST endpoints to power high-throughput lead-generation pipelines.

EDUCATION

MS Software Engineering, Vellore Institute of technology, chennai

06/2014 – 05/2019

8.08 CGPA

SKILLS

Frontend Engineering & Architecture — Core Languages: JavaScript (ES6+), TypeScript | **Frameworks & Libraries:** ReactJS, Redux (State Management) | **UI/UX & Design Systems:** HTML5, CSS3, Tailwind CSS | **Performance & Discovery:** Technical SEO

Backend, Systems & Data — API Architecture: RESTful API Development, Express | **Runtime & Frameworks:** Node.js, Spring Boot | **Database Management:** SQL, MongoDB | **Core Engineering Fundamentals:** Data Structures & Algorithms, Advanced Problem Solving

Software Architecture & Infrastructure — System Design: Distributed Systems, System Architecture, Scalability Design | **DevOps & Delivery:** Git (Version Control), DevOps (CI/CD Basics) | **Strategic Ownership:** Full-Lifecycle Personal Projects

PERSONAL PROJECTS

SHAILAJA IAS

01/2024 – 04/2024

- Secured a project to design and develop a website for a UPSC institute, managing the project from end to end independently.
- Showcased capability in full-stack development by integrating frontend design skills with backend database management to create a comprehensive solution tailored to the institute's needs.
- Hosting the project on Firebase while ensuring smooth operation and scalability.
